

TRANSFIX LIQUID

A recently developed product from Colourcraft which allows full colour transfer of Colourcraft disperse dyes (Transfer dyes) to be achieved onto natural fabrics e.g. cotton, linen, calico etc. Previously these dyes have been mainly restricted to use on polyester fabrics.

METHOD:

Apply the liquid to any area of fabric you wish to decorate and allow to dry.
Prepare transfer designs onto paper using Colourcraft transfer dyes.
Then heat transfer onto the treated area of fabric in the normal way.

The transfer may be applied by all the usual methods - spraying, sponging etc.
A degree of blending can be achieved by printing before the liquid is fully dry.

SAFETY IN USE:

Care should be taken when handling all dyes, chemicals etc.
Protective clothing and gloves, eye protection etc. is recommended.
Precautions should be taken to avoid accidental ingestion, inhalation and skin and eye contact.
Keep containers closed and away from children.
Use products in a well-ventilated area.
